

The AAPT Council have decided to strive ahead with a physical event this year. We are closely monitoring government guidance which is constantly updating. The Covid 19 effects have been widely felt by APT's and mortuary teams and we are hoping that the opportunity to safely get together to learn and share experiences will help with our wellbeing and preparation for the next wave or pandemic. The event will include expert lectures, an opportunity to meet our commercial partners and discover new innovations within our realms. Should the government road map dictate changes in gatherings, this event may be postponed.

**All delegates must abide by government & venue guidelines.**

**SATURDAY 25TH SEPTEMBER**
