Dear Michelle

Application for Additional Qualification Approval – Centre 4521

I am pleased to confirm that University Hospital of North Tees has been approved to offer courses leading to the following qualifications:

RSPH Level 4 Diploma in Anatomical Pathology Technology

Please note that the Centre can use any staff that it deems suitably qualified in the delivery of these programmes. RSPH does not approve individual trainers but would expect all trainers to be suitably qualified and experienced.

RSPH qualifications are regulated by Ofqual, Qualifications Wales and CCEA. Certificates issued by RSPH to successful candidates bear the logos of one or more of these regulators.

RSPH reserves the right to withdraw approval at any time in the event that it has evidence of inadequate standards being applied by the Centre or that other circumstances require it to withdraw these qualifications generally. In the latter case RSPH will provide the Centre with as much notice as possible of its intentions. This will be at least twice as long as teaching programmes leading to the qualification but frequently longer.

I should like to congratulate your Centre on obtaining this approval and wish you every success in the running of these programmes.

Yours sincerely,

Robert Smith
Compliance and Quality Assurance Manager
