*Combining the expertise of cutting edge reconstructive specialists with established academic masters, this five day course offers students new skills and techniques in cranial and facial reconstruction.*

#### DON'T TAKE OUR WORD - HERE ARE THE VIEWS OF RECENT GRADUATES.

"This course is a true experience. Set aside any pre-conceptions you may have about the difficulties of severe trauma cases and let tutors Martin and Ross turn your apprehensions into exciting challenges. The course is intense but you WILL gain many new skills to complement your existing abilities. The 5 - day journey will be a roller coaster: moments of surprise, puzzlement, frustration, and great feelings of satisfaction. The expert guidance at hand ensures your confidence is boosted to levels you didn't think possible. This is the first course of its kind in the UK collaborating to create something that will excite, educate and empower embalmers to reach new heights of professional expertise."

*Andy Floyd*  
BSc (Hons), MBIE, BIE Accredited Tutor

"This course exceeded all my expectations. I cannot thank the tutors enough for their knowledge, guidance and support during my time there. Their passion is truly inspiring and it is so apparent in everything they do. Teaching is practical, well structured and course material is available in different media to keep you informed throughout. And having tutors on hand gives you confidence to take on anything. I would highly recommend this course. I have grown in my skill set and confidence as an embalmer. The day I change everything for one family by making a closed coffin viewable; it will have been worth every penny."

*Rachel Carline*  
MBIE

"Everything about this course is first class all the way. The new skills I have learned will put me in good stead for doing all type of skeletal and soft tissue repair here at University of Oxford. The lectures were interesting, informative, and made each new step easy to take. Style of teaching is calm and clear balanced by practical sessions which quickly saw amazing results. My fellow students were a great bunch from several different professions but we've all left with new skills, knowledge and pride in what we do. I strongly recommend this course to anyone dealing with trauma. Tutors and this course are a credit to our profession."

*Rob Mifflin*  
Head of Mortuary Bequest Office,  
University of Oxford

"Initially I was sceptical with questions about the practicality of completing reconstruction techniques. From our first introduction to the team, it was evident the pride and care they have in their work. Martin and Ross deliver clear and concise direction in an informal manner; there was no pressure, just reassurance and guidance. I feel better equipped to serve families and can count on the tutors for support in any reconstruction I may complete. In prestigious surroundings with like-minded colleagues, this course enables me to help families say goodbye - a chance that may have previously been denied to them."

*Melissa Wilson*  
MBIW, MEAE, BIE Accredited Tutor
